Industrial expertise. Design thinking.

We turn the vision of architects, designers and leading organisations into tangible solutions.

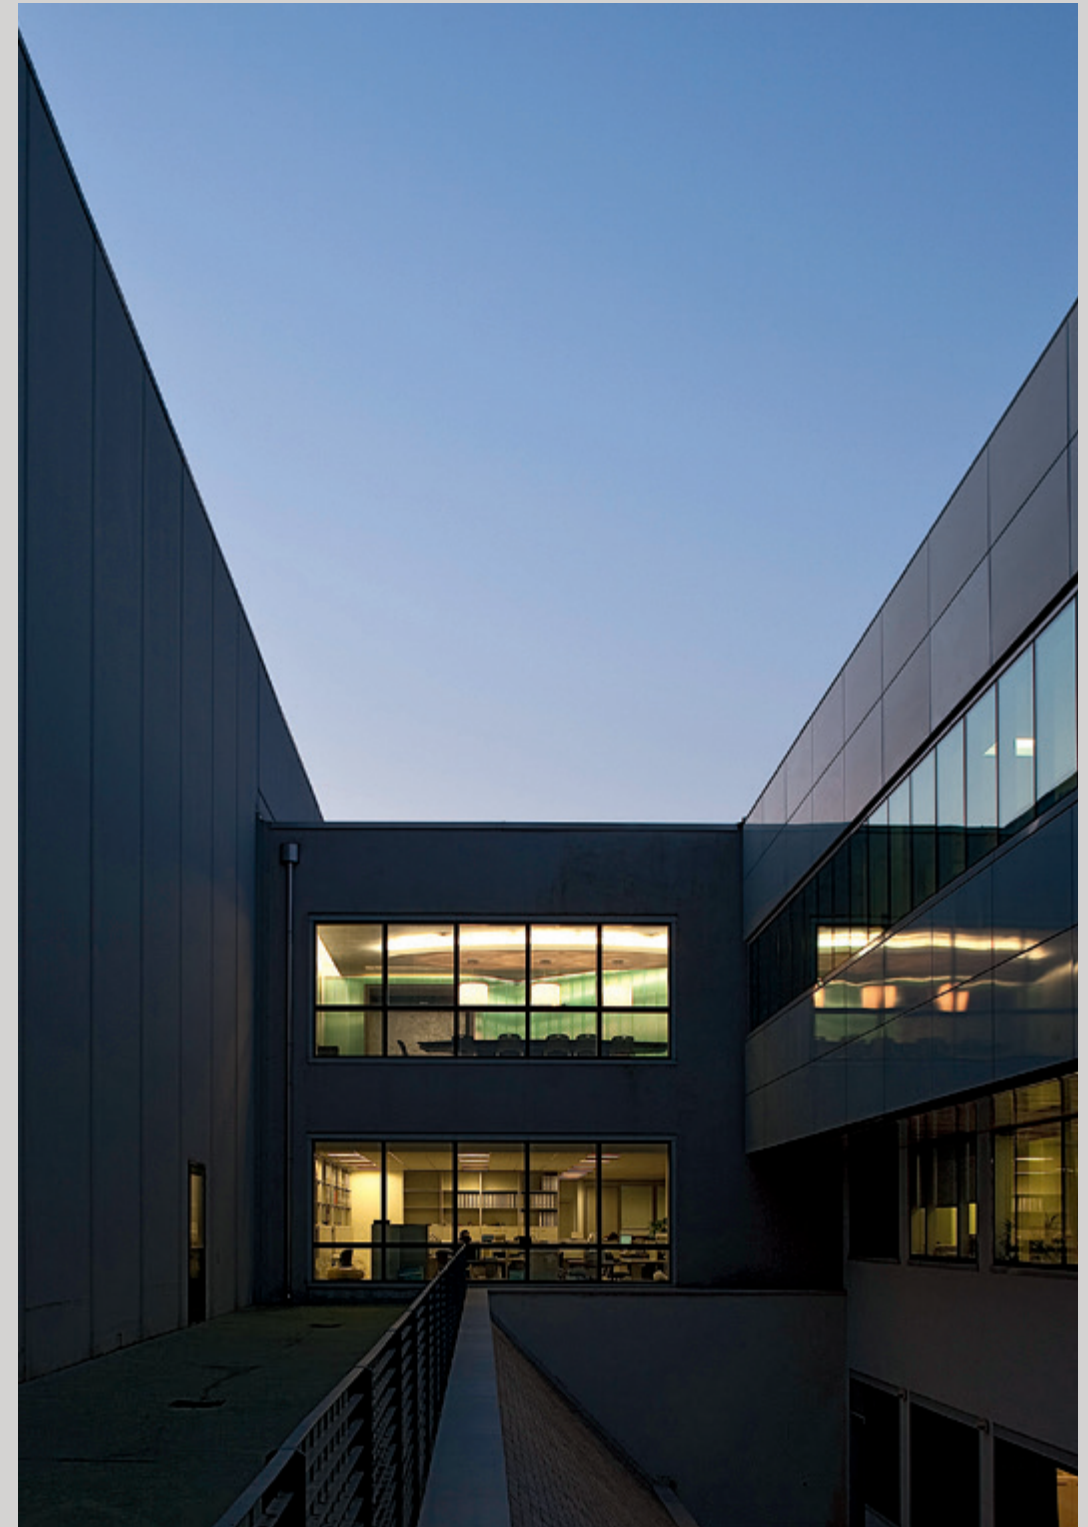

We are where design thinking meets industrial expertise, transforming the challenges of contemporary workplaces into flexible, sustainable furnishing solutions.

DVO

Since 1990, DVO has been shaping the evolution of workplace environments through furnishing systems that combine design culture, industrial expertise and the excellence of Italian manufacturing. Present in more than 80 countries, DVO partners with architects and designers to create workspaces that seamlessly combine functionality, identity and wellbeing. Versatile collections, extensive customisation options and a service-driven approach enable every project to become a coherent, long-lasting solution designed to support the evolving ways people work, collaborate and connect.

Sitland

Since 1977, Sitland has been developing seating systems where design, ergonomics and innovation come together to enhance the experience of contemporary spaces. Every collection is the result of a balance between aesthetic research, manufacturing expertise and a deep commitment to people's wellbeing, providing architects and designers with flexible solutions for workplace, hospitality and contract environments. Meticulous attention to detail, extensive customisation possibilities and a sustainability-driven vision define an authentic Made in Italy design approach.

Everyone's Pace: the harmony of space, shaped around the people who experience it

Wellbeing is the guiding principle behind every project from the very beginning. We create flexible environments that adapt to change, support different ways of working and evolve in harmony with the people who use them every day. The result is a collection of spaces that foster comfort, collaboration and productivity, growing over time alongside the evolving needs of people and organisations.

PURPOSE

We stand out for our solid full-service organisation, offering specialised expertise, innovation and integrated, people-centred solutions in line with the new paradigms of well-being across people, space and sustainability.

MISSION

We deliver a holistic service, integrating design, sustainability, innovation and technology into every project.

VISION

We aim to enhance people's lives in work environments, offering personalised and comfortable solutions that adapt to their daily rhythms.

Our approach: A fully integrated project delivery process

SPECIALISED DEPARTMENTS

350+

PROJECTS COMPLETED WORLDWIDE

We go beyond supplying furniture and seating. Through dedicated multidisciplinary teams, we oversee every stage of the project, transforming complexity into reliable industrial solutions. As a trusted technical partner, we preserve the integrity of the original design vision from the initial concept through to final installation.

1. TECHNICAL & COMMERCIAL CONSULTANCY: EVERY PROJECT BEGINS WITH LISTENING

Every project starts with a deep understanding of our clients’ objectives. By analysing technical constraints, brand identity and functional requirements, we work alongside architects, designers and clients to develop solutions that are effective, coherent and built to last.

2. TECHNICAL DESIGN: IF A SOLUTION DOESN’T EXIST, WE DESIGN IT

We transform every requirement into a technically viable solution, going beyond the limits of standard products. Working in close collaboration with our R&D and Sustainability departments, we ensure full compliance with regulations, certifications and project-specific requirements.

3. SPACE PLANNING: FUNCTION, IDENTITY, VISION

Using pCon.planner, we develop complete workspace layouts that integrate our collections into coherent, functional environments. From detailed technical drawings to turnkey solutions, we provide a clear project vision designed to maximise the value of every space.

4. LOGISTICS: EFFICIENCY, FLEXIBILITY, RELIABILITY

Our just-in-time logistics ensure immediate availability of standard products, while an established network of strategic manufacturing partners enables us to deliver bespoke solutions without compromising on quality, reliability or lead times.

5. DELIVERY & INSTALLATION: FROM CONCEPT TO COMPLETION

Coordinate site surveys, executive design and installation through highly qualified specialists supervised by dedicated project managers. Every phase is managed with precision to ensure that deadlines, quality standards and project expectations are consistently met.

6. CUSTOMER CARE

Our commitment doesn’t end with delivery—it evolves into a long-term partnership. Through our dedicated After-Sales Service, we provide continuous technical support, ensuring prompt assistance and reliable expertise whenever post-installation needs arise.

Certifications as a design tool

We believe a project is truly sustainable only when it is designed with the future in mind. That’s why internationally recognised standards such as FEMB LEVEL®, LEED® and WELL® are more than certifications to achieve: they form the foundation of a shared design approach developed alongside architects and designers. Through a rigorous assessment of every component, we deliver furnishing solutions that combine outstanding environmental performance with lasting comfort and wellbeing. This is how we support architects, designers and clients: by ensuring that every workplace is, above all, a genuinely human-centred environment.

Quality & Safety

UNI EN ISO 9001
Quality Management System

UNI EN ISO 45001
Occupational Health and Safety Management System

UNI EN ISO 16000-9 e 16000-6
Low VOC emission panels

CARB PHASE 2
Low-formaldehyde emission panels

Environment

SEAQUAL
INITIATIVE

SEAQUAL
Supporting marine plastic recovery initiatives

FSC®
Chain of Custody certification for responsibly sourced timber

UNI EN ISO 14001
Environmental Management System

EMAS
Eco-Management and Audit Scheme (EMAS)

LEED®
LEED mapping for furniture and partition systems helps projects achieve specific LEED credits, supported by the GreeniTOP Label, Italy’s leading community of companies committed to sustainable construction

Product

	WELL BUILDING STANDARD® V2 International certification system promoting health and wellbeing within buildings
	FEMB LEVEL®3 European sustainability certification programme for office furniture, assessing environmental, social and economic performance
	GREENGUARD Indoor Air Quality certification
	CAM Compliance with the Minimum Environmental Criteria (CAM) for the procurement and leasing of office furniture by the Italian Public Administration
	UNI EN ISO 11654 Acoustic performance: sound-absorbing panels achieve Class A sound absorption
	EN 13501-1 Sound-absorbing panels achieve B-s2,d0 fire reaction classification
	CE MARKING Internal partition systems comply with the requirements of the European Technical Assessment (ETA)
	LEGISLATIVE DECREE 81/08 (ITALY) Workplace safety. Workstations comply with the requirements set out in Annex XXXIV
	UNI EN 527-1 E 527-2 All desks comply with the applicable technical standards
	UNI EN 16121 Safety, strength, durability and stability requirements for non-domestic storage furniture

	UNI EN 1335-1, UNI EN 1335-2 Ergonomics, dimensions, safety, strength and durability in office seating
	UNI EN 16139 Safety, strength, and durability for office visitor chairs

Ethics

	ECOVADIS Global benchmark for sustainable and resilient supply chains
	AEO Authorised Economic Operator (AEO) status
	ISO 37001 Anti-Bribery Management System
	UNI/PDR 125:2022 GENDER EQUALITY Gender Equality Certification
	SA 8000 Social accountability standard ensuring ethical, fair and safe working conditions

Resources for better design

Successful projects begin with reliable information, high-quality materials and the right tools. That's why we provide a comprehensive ecosystem of resources designed to support every stage of the design process: from material selection and technical development to the definition of complete workspace solutions.

PCON.PLANNER

The complete DVO and Sitland catalogue is available on pCon.planner, featuring configurable models, technical data and continuously updated content. A powerful resource for developing layouts, visualisations and quotations quickly, accurately and fully integrated into the design workflow.

FINISH & MATERIAL SAMPLES

A comprehensive selection of finishes, fabrics and materials to evaluate textures, colours and combinations. Essential tools for refining every design detail and creating solutions that reflect the identity of each space.

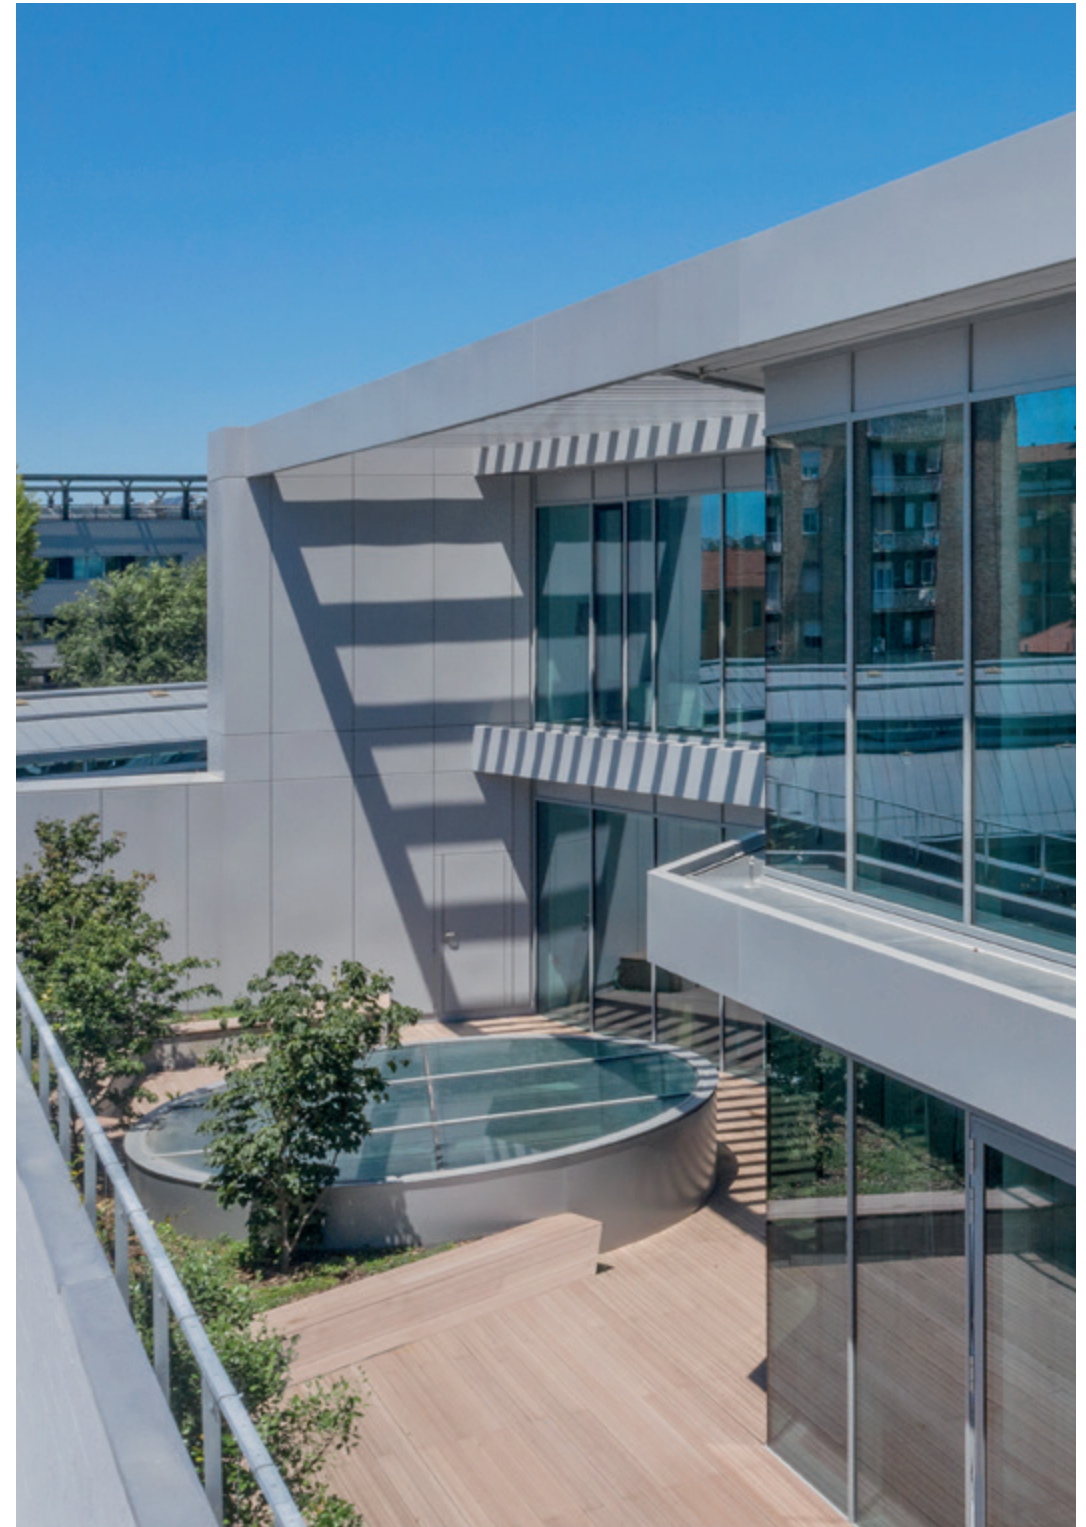

DOWNLOADABLE RESOURCES

Brochure, technical data sheets, CAD files and dedicated documentation are readily available to support the design process, simplify product specification and seamlessly integrate our solutions into every stage of the project.

Projects as a shared value

With a structured, flexible and collaborative approach, we have successfully delivered projects for corporate offices, executive workplaces, contract environments and workspaces across the globe. Every project is the result of a close partnership, developed to address specific requirements with effective, tailored and long-lasting solutions.
